Primary estimates give each of 20 gradients equal influence; whiskers are gradient-bootstrap 95% intervals

Marginal R^2 (R^2_m)

Conditional R^2 (R^2_c)

Climate-only (n = 1604 effects; 526 species)
LDMC (n = 1148 effects; 288 species)
LMA (n = 1216 effects; 327 species)
Vegetative height (n = 1180 effects; 303 species)
Graminoid status (n = 1604 effects; 526 species)
Woodiness (n = 1604 effects; 526 species)
Phylogeny (PEV1-PEV3) (n = 1604 effects; 526 species)
